Six U.S. Public Libraries Select SirsiDynix Library Management Systems

Libraries serving nearly 700,000 people improve library services with SirsiDynix solutions

HUNTSVILLE, Ala., July 18, 2006 – SirsiDynix, the global leader in strategic technology solutions for libraries, announced today recent sales of the SirsiDynix Horizon and Unicorn® Library Management Systems to six public libraries, together serving nearly 700,000 people, in the United States:

- Arkansas River Valley Regional Library System, Dardanelle, Ark.
- Bloomington (Ill.) Public Library
- Homer (Alaska) Public Library
- Little Elm (Texas) Public Library
- New Braunfels Public Library, New Braunfels, Texas
- Stanislaus County Library, Modesto, Calif.

In addition to Unicorn, Homer Public Library, Little Elm Public Library and New Braunfels Public Library also selected SirsiDynix DataStream™ enriched content. Bloomington Public Library also purchased DataStream, along with Unicorn, as well as SirsiDynix Rooms™, SirsiDynix-hosted SingleSearch™ federated search tool and an upgrade to SirsiDynix Enterprise Portal Solution™.

Along with Horizon, Arkansas River Valley Regional Library System and Stanislaus County Library purchased Web Reporter and SirsiDynix enriched content.

“SirsiDynix will enable us to provide updated technology and remote access capabilities that will increase the number of people who can and will use library services,” said Tina Hager, director of Little Elm Public Library. “Though the library has 16 public access computers with over 1,100 uses each month, there are still one- to two-page waiting lists for the computers. It is evident that computer access is an important service to our community. We are very excited about the idea of providing even better customer service to anyone who chooses to access the library either in person or online.”

Berit Nelson, SirsiDynix vice president of technical product design, said, “Public libraries have a vital role to play in 21st-century communities. At SirsiDynix, we’re focused on supporting libraries in their mission to serve their patrons and entire communities. That’s why we offer comprehensive integrated systems like Horizon and Unicorn that improve the internal productivity of libraries and enhance their capabilities for serving people.”

About SirsiDynix

SirsiDynix is the global leader in strategic technology solutions for libraries – vital institutions whose primary mission is to make sense of the vast world of information for people and communities. This is an exciting role as libraries assist people in discovering and using knowledge, resources and other valuable content for their educations, jobs and entertainment. In concert with key industry partners, SirsiDynix supports this strategic role for libraries by offering a comprehensive integrated suite of technology solutions for improving the internal productivity of libraries and enhancing their capabilities for meeting the needs of people and communities. SirsiDynix has approximately 4,000 library and consortia clients, serving more than 300 million people through more than 20,000 library outlets in the Americas, Europe, Africa, the Middle East and Asia-Pacific.
