

## Certified Solutions Provider SirsiDynix Symphony Guidelines

Participation as a SirsiDynix Certified Solutions Provider is an effective, efficient way to ensure that your SIP2 and NCIP compliant products will interoperate properly with stated SirsiDynix software.

### Testing Guidelines

1. Certification is available on the latest releases of SirsiDynix Symphony.
2. The port given will remain open as long as the vendor continues to pay their certification fee.
3. As SirsiDynix delivers a new release or sub-releases (in the same calendar year) of a given version of SirsiDynix Symphony, vendors will be required to re-test against the new major release and sub-releases, but at no additional charge.

### Testing Process

All steps below will begin *only* when the attached application has been completed, the Non-Disclosure Agreement is signed, and the SIP2 and/or NCIP Certification fee is collected. The *annual* fee for SIP2 or NCIP testing is \$2,000 USD per calendar year. If you choose to certify for both SIP2 and NCIP, the *annual* fee is \$3,000. Initial certification fees are prorated for first-time certification. If you begin the initial testing process after the first quarter of the calendar year, the SIP2 fee will be charged according to the schedule below:

1st Qtr - \$2,000  
2nd Qtr- \$1,500  
3rd Qtr - \$1,000  
4th Qtr - \$500

Subsequent renewal fees will be due at the beginning of each calendar year. If renewal fees are not received by March 1 of each calendar year, then the company will be removed from the SirsiDynix Web site until fees are collected.

1. Upon receipt of your payment, SirsiDynix will strive to, within 10 business days, provide all testing vendors with the contact information of the SirsiDynix staff member who will be overseeing the testing process, and information about connecting to the server. You will need to supply an IP address for connectivity and give us your time frame for testing. The testing vendors will then be given a testing database of patron and/or item information. After testing, you, the testing vendor, will send us packets via the access information we provided. You should test any and all SIP and/or NCIP messages that you use and that we support on our server. If you encounter any issues while testing, please notify us via [SIP2@sirsidynix.com](mailto:SIP2@sirsidynix.com).
2. When you have completed testing with the samples provided, please send a message to [SIP2@sirsidynix.com](mailto:SIP2@sirsidynix.com) to let us know that you have completed testing. This message should include any SIP and/or NCIP log/trace files from your system. We will compare your files with our SIP and/or NCIP trace files to verify that the test went well. Please include the version of your software and the name of the product that you tested with so we can complete your certification paperwork.
3. After your files have been reviewed, you will receive notification from SirsiDynix regarding your compliance status. If you do not pass all testing requirements, you may repeat the testing process as listed above in Testing Guidelines.

4. After positive proof of compliance, you will be listed on the SirsiDynix Web site as a Certified Solutions Provider. Participation in this program does not endorse your company or products by SirsiDynix beyond the SIP2/NCIP Certification.
