

About INFOhio

INFOhio brings resources that inspire lifelong learning to K-12 students. With SirsiDynix Enterprise, students, parents and educators from across the state of Ohio, have access to school library resources and a vast collection of digital and online resources, delivered in grade- and subject-specific rooms that encourage curiosity and enhance learning.

Reliable resources

Getting to the right information can be a difficult task if you are armed only with an internet connection and a browser. With SirsiDynix Enterprise, students using INFOhio can explore online rooms created for their education level and subject, surrounded by facts, tools, and related websites in this one-of-a-kind catalog of the very best curriculum-related content on the Web. Teachers and parents can be confident that what students find in INFOhio rooms are known to be credible and relevant.

It takes a village

INFOhio recognizes that a child's education involves more than just the student, and so content is available for teachers, school librarians and families to support their role. Enterprise delivers rooms of content tailored to those roles. Family rooms bridge the partnership between school and home, with resources that help families to support their students' education. Educators can find resources such as curriculum standards-based lesson plans, assessments, research and improvement programs. What's more, SirsiDynix and INFOhio have

collaborated to ensure that the content delivered through Enterprise® provides complete coverage of nationally recognized K-12 curriculum standards.

Discovering an education

Searching within Enterprise, students get immediate results from their local school library catalog as well as a vast index of the very best digital and Internet-based resources, all in a single relevance-ordered result set. Enterprise at INFOhio gives students a learning environment that piques their interest and makes learning relevant to their world.
