

SirsiDynix® Social Library

Increase your library's social IQ *and* its circulation.

Chances are, your library already has a Facebook page for interacting with your community and promoting library events. With the SirsiDynix® Social Library solution, that Facebook page can now become a full-access catalog and research tool as well. SirsiDynix Social Library enables a fully native Facebook application that lets your library users search, place holds, view, rate, discuss and share library materials all within Facebook.

With Social Library working seamlessly with your library as a Facebook virtual branch, you gain all the benefits and visibility without expending any extra effort.

Go where your users are

tap into the 800 million-user community already existing on Facebook.

Take advantage of the viral marketing network

by putting your library in the social dialog.

Increase user registration and circulation

by providing easy access to the library for current and prospective users.

And with advanced analytics capabilities built in, all activities taking place in your Social Library branch can be tracked in great detail and included in your library circulation and user reports.

How it works

Library users will be able to securely log in to their library via Facebook, just as they do online or at the physical library today using the same credentials. Logging in enables additional features for users including the ability to access My Account features:

View and add new favorites to personal lists

Update contact and profile information

Review account history

Pay library fines and fees securely, right from Facebook.

Increase your library's visibility on the network where users spend more than 700 billion minutes each month. Every day more than 2 billion posts are "liked" and commented on, 500 million users log in and 200 million photos are uploaded in Facebook — SirsiDynix Social Library takes you there.
