BLUEcloud Analytics

BLUEcloud Analytics brings enterprise-class reporting to your library. With completely flexible reports and powerful visualizations, you can easily find the information you need to make a decision.
Data made simple

BLUEcloud Analytics gives you fully-customized, elegant reports delivering exactly the datasets you want in ways you can understand. Built on the robust MicroStrategy Platform using the latest version (10), BLUEcloud Analytics now gives more options for consuming your data, with fewer demands on staff to create reports.

Make your reports work for you

Create your own reports with BLUEcloud Analytics using any combination of the data you track—from catalog items to bills and users. Not sure where to start? BLUEcloud Analytics comes with

Product Highlights

– Elegant, interactive, visualized data

– Tiered subscription for exactly the features you need and none that you don't

– Choose from an extensive catalog of stock reports or pull from more than 700 data elements for building your own

– Easy distribution with automated delivery and streamlined sharing options

Dive in with professionally designed stock reports or work with SD to customize exactly what you need. BLUEcloud Analytics delivers your data as you like it.

pre-made reports that you can use out-of-the-box or as a base for customization. Or select from the BLUEcloud Analytics Report Catalog, an ever-growing bank of shared reports from libraries like yours.

With new tiered options, BLUEcloud Analytics allows you to scale your subscription to suit your needs and resources.

Spend your time on insights, not extractions

Build as needed, or set up BLUEcloud Analytics to automatically generate your reports of choice. With no manual uploading, your extractions happen automatically, quickly, and securely. Hands-off extractions means you have more time to analyze and make important decisions.

BLUEcloud Analytics Packages

Essentials
Let SirsiDynix set up and schedule reports for you, or let your team customize, run, and schedule their own reports.

Plus
Includes Essentials features. Plus more users, more years of data, and the option to incorporate non-ILS data.

Pro
Includes Plus features along with unlimited Reporter and Analyst accounts, 5 years of historical transaction data, and the most customizations.

Share what you want, when you want, how you want

Set permissions for individual reports, and BLUEcloud Analytics will only show users what you want them to

see. Or BLUEcloud Analytics can automatically email interactive reports in the format of your choosing (PDF, HTML, XLS, CSV), so your staff get detailed information without touching a live report.
