Horizon Release Adds Refined Features for Improved Efficiency and Efficacy

Horizon 7.5.4 to deliver technology update for increasingly powerful and dependable ILS

September 26, 2016, Lehi, UT—SirsiDynix is pleased to announce the release of Horizon 7.5.4. The latest Horizon update provides new, powerful capabilities to a long-standing, dependable solution, helping Horizon libraries provide the Best Library User Experience for both library staff and end users. SirsiDynix is dedicated to providing libraries with progressive and continually-advancing solutions.

The updates included in Horizon 7.5.4 are products of library-partner input via the SirsiDynix Enhancements and Strategic Partner Program. Improvements include a duplicate borrower alert, hold transit groups, option to identify patron preferred mailing addresses, and patron preferred ID account options.

Commenting on the release, Horizon Product Manager Brent Thompson said "The Horizon team is pleased to move forward with the release of Horizon 7.5.4. We work to provide our libraries the functionality that will optimize their systems and library workflows. It is our pleasure to work with library partners who help us plan and design the features that make Horizon a progressive system. The best-practices implemented by our development team are what make Horizon so dependable for the long-term. Together, our library partners and development team have made Horizon into a product with a solid foundation that is built for growth into the future."

"The release of Horizon 7.5.4," said SirsiDynix CEO Bill Davison, "marks another step forward in the SirsiDynix mission to serve our libraries and provide them with the Best Library User Experience. Our continued commitment to further enhance Horizon allows our customers to meet the changing needs of their communities with state of the art solutions."
