**LOUIS adds multiple SirsiDynix Symphony customers to its community**

*LOUIS: The Louisiana Library Network grows to include 33 Symphony sites with plans to add more in future*

LEHI, UTAH (July 31, 2014)- LOUIS: The Louisiana Library Network has extended its SirsiDynix Symphony community to include 33 sites since adding Centenary College and Northshore Technical Community College in 2013 and Xavier in 2014. LOUIS is also growing to include Our Lady of Holy Cross College and aims to add more technical community colleges in the coming years. Symphony is a driving force behind SirsiDynix's BLUEcloud Suite, allowing libraries to benefit from efficient, intuitive technology with the flexibility to edit catalogs, fulfill user needs, accept debit payments, and more.

"SirsiDynix is proud to see BLUEcloud technology expand within the community," said Bill Davison, SirsiDynix CEO. "Today's libraries have diverse and complex needs; Symphony is able to meet these demands with its unique architecture to support multiple hardware platforms, operating systems, and databases within an ever-changing world of IT requirements. LOUIS's growth is a great example of how libraries are benefiting from such a highly adaptable system."

LOUIS's growth is also testament to its recent integration between Symphony and EBSCO Discovery. "SirsiDynix is a vital partner of LOUIS," said Sara Zimmerman, Executive Director of LOUIS. "Since 2000, SirsiDynix has always listened to our needs and has respected the knowledge of the LOUIS staff. The Symphony system is well managed by LOUIS; it is improved upon by SirsiDynix, especially with the BLUEcloud products coming out, and by integrating with EBSCO Discovery, a product we have for most sites."

Combined with SirsiDynix's BLUEcloud technology, LOUIS's growth is a great example of what next-generation library services can do.

###

### **About LOUIS**

LOUIS: The Louisiana Library Network is a project of the Louisiana Academic Library Information Network (LALINC), a consortium of public and private college and university libraries. This partnership, established in 1992 by academic library deans and directors, currently has 49 members, and is funded by LALINC members and the Louisiana Board of Regents. With a centralized support staff, LOUIS combines the collective resources of all members to produce a dynamic library consortium. LOUIS provides member-approved initiatives which include information technology solutions such as an integrated library system, a digital library system, an interlibrary loan system, electronic scholarly resources, remote access, any time, any place, and a host of other services. LOUIS is growing, adding new member institutions, as a result of the continued efforts of the state to refine the community and technical college system.

**About SirsiDynix**

SirsiDynix connects people with knowledge at more than 23,000 libraries around the world. Through library management technology and search and discovery tools, libraries using SirsiDynix technology bring relevant resources and the power of knowledge to their users and communities. SirsiDynix technology is architected to be open, scalable and robust, offering a complete solution out-of-the-box, and unparalleled flexibility through APIs and web services. Complemented by the most experienced training, consulting and support staff in the industry, SirsiDynix helps libraries create tomorrow's libraries, today.
