# eResource Central Goes Live with Odilo Connector

*Odilo's collection of 1.1M digital titles now available through eResource Central*

September 12, 2016, LEHI, UT—SirsiDynix is pleased to announce the go-live of the Odilo connector for eResource Central. This new connector makes more than one million Odilo titles available to subscribing libraries and their patrons. The addition of the Odilo platform contributes a considerable expansion of the content and options available to BLUEcloud libraries via eResource Central and stands as a further realization of the SirsiDynix best-of-breed mission to make the most and best resources available to libraries.

As a global leader in the eBook industry, Odilo offers a comprehensive product suite for the discovery, management, and distribution of library print and digital materials. Odilo provides quality English, Spanish, and other foreign language eBooks, eAudiobooks, and eVideos from over 2,500 publishers. The new eResource Central connector, recently completed by the Odilo team, makes Odilo's extensive collections of digital content available to SirsiDynix libraries by integrating directly into the eResource Central platform.

"Odilo is proud to enhance our users' experiences by partnering with SirsiDynix," said the CEO of Odilo, Rodrigo Rodriguez. "This partnership will make the search, discovery, and checkout of our digital content easier to use and access, all from within an already familiar library OPAC. Odilo's cutting-edge, flexible, and cost effective technology now truly meets the needs of the 21st-century digital user."

"SirsiDynix is delighted to partner with Odilo," said SirsiDynix CEO Bill Davison. "The Odilo platform is an excellent resource for our libraries, providing a vast and valuable collection of titles. Its direct integration into eResource Central provides an easy-to-use solution our libraries can offer their patrons. In keeping with our best-of-breed approach, Odilo's addition to eRC presents another industry-leading option BLUEcloud libraries can draw upon to create the Best Library User Experience."
