

BLUEcloud *for* KIDS

Engage kids in an immersive, fun library experience even when they aren't in the library with SirsiDynix' app, BLUEcloud Mobile for Kids. It is an exciting way to get kids involved with what's going at your library, and encourages them to keep coming back!

Features

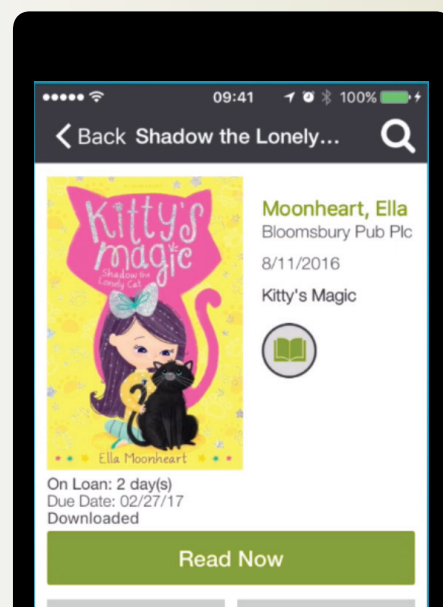

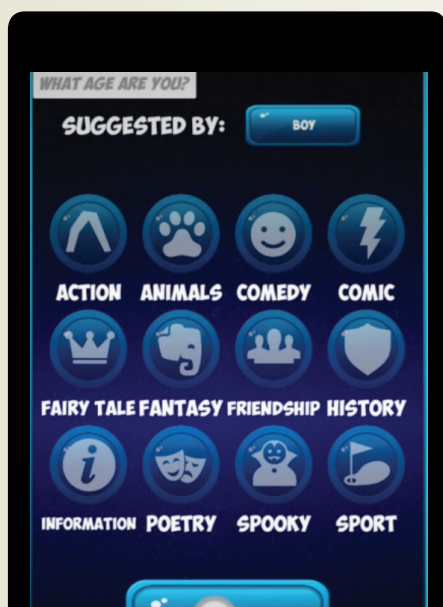

- Interactive games for kids
- Full access to your online catalog
- Download and read content from the app
- Add books to their reading wish list
- Find activities happening at the library
- Complete online challenges

BLUEcloud Mobile for Kids is designed with your younger patrons in mind. It allows kids to keep their library cards on their devices so that they always have access to them. They can search your catalog using the fun interface for all of the resources available at your library. This app is made to help kids take better advantage of what your library has to offer them.

What's included?

Interactive Games

BLUEcloud Mobile for Kids gives users access to a variety of games. They can play augmented reality games while physically being in your library, and collect a number of different characters that will appear if they are playing. They can also access bonus games around the holidays if they are playing in your library.

Full Catalog Access

When kids download the app, they will have full online access to your library's catalog. They can search for titles, create and keep wish lists, and even scan a bar code in a shop to see if they can check-out that book from your library. They can also search, borrow, and read e-books directly from the app.

Challenges

Kids can complete different online reading challenges and earn rewards for other games found inside of the app.

Location Information

BLUEcloud Mobile for Kids will inform them of activities happening at that library closest to them.
