

EOS.Web– Now a FedRAMP Low Authorized ILS

March XX, 2020, Lehi, UT– SirsiDynix is happy to announce the completed FedRAMP authorization for EOS.Web. EOS.Web customers can now use the FedRAMP Low Authorized Integrated Library System (ILS) data center.

FedRAMP provides a standardized, federally approved, and secure approach for all applications that host government data in the cloud. SirsiDynix has worked with an agency and partner to obtain FedRAMP authorization which provides a streamlined ILS acquisition and/or renewal process. After completing the extensive assessment and development required, EOS.Web now supports the FedRAMP requirements.

“We are elated about this EOS.Web certification,” said SirsiDynix CEO Bill Davison. “It validates SirsiDynix’ commitment to security, placing the EOS.Web ILS among fellow FedRAMP Low authorized ILS systems. Plus, customers can host the certified product in our FedRAMP certified data center.”

SirsiDynix is excited about this new development for their EOS.Web system and are excited to continue working to improve and grow their ILS in order to continue helping their customers.

About SirsiDynix

SirsiDynix believes in the power that libraries have to transform and shape their communities. That power is what inspires them to connect people with knowledge at more than 23,000 libraries around the world. SirsiDynix technology combines relevant resources with the best library user experience.
