March 28, 2023, LEHI, UT, and WATFORD, UK—SirsiDynix is pleased to announce that they have been named as a supplier on Crown Commercial Service's Vertical Application Solutions framework.

This framework offers a flexible route to market for sector-specific vertical application requirements. Vertical Application Solutions (VAS) presents a range of vertical-specific software solutions for the public sector, ranging from Local Authority customers to Bluelight, Education, Community Health, and Social Care. The purpose of VAS is to provide each sector with access to suppliers who are specialists in software solutions for that market.

SirsiDynix have been accepted onto Lot 4 – Citizen Services, section 1 – Library Solutions. The lot includes implementation, software, migration, integration and security, user training, maintenance, and support.

Crown Commercial Service (CCS) supports the public sector in achieving maximum commercial value when procuring common goods and services. In 2021 and 2022, CCS helped the public sector secure commercial benefits equal to £2.8 billion, supporting world-class public services that offer the best value for taxpayers.

"When it comes to providing prospective and current customers a streamlined, cost-effective way to purchase library solutions that meet the needs of their communities, the Vertical Applications Solutions framework is incredibly important," says SirsiDynix CEO Bill Davison. "We are delighted to be named as a supplier."

Barbara Pacut, Vice President of EMEA Sales and Operations at SirsiDynix, echoes Davison's excitement: "We partner with many different types of libraries to provide innovative technology and services for their customers. We welcome this framework as an alternative fast and efficient route to procure our solutions."

### *About Crown Commercial Service*

Crown Commercial Service (CCS) is an Executive Agency of the Cabinet Office, supporting the public sector to achieve maximum commercial value when procuring common goods and services.
