BLUEcloud Analytics: Library

The MicroStrategy Workstation

Unite resources from across the library and manage them from one locally installed client. Here you can oversee users, subscriptions, and schedules; monitor jobs, cubes, and caches; and import data from third-party connectors.

MicroStrategy Library Interface

Used by Fortune 500 companies around the world and designed specifically for consumers, this responsive, web-based interface allows you to present, certify, and custom-brand dossiers—and embed them directly into your library's website.

BLUEcloud Analytics: MicroStrategy Workstation Users

Platform Analytics

Evaluate system usage—including user logins, report engagement, and subscription activity—with exclusive access to three sharable sets of data: Summary Statistics, Subscriptions, and Users. Or use this dossier as a launchpad for new reports.

Data Connectors

Simplify the data management process by offering seamless integration with an array of popular platforms. With built-in connectors for Google Drive, Google Analytics, Dropbox, and more, you can effortlessly import and update datasets and ensure data is both current and accessible.
