January 13, 2026, LEHI, UT— SirsiDynix, a leading provider of library technology, is pleased to announce that the City of Irvine Public Library has selected Symphony on SaaS as their new integrated library system (ILS).

Founded in 2025, the library system is already driving big change for their community. In 2024, they transitioned library operations from the Orange County Public Library (OCPL) system. Now, they're delivering a more personalized, locally focused approach to library services at two City-run branches, both of which opened in August 2025. Plans for future expansion, including the debut of a third branch early this year, are close on the horizon.

For the new system, which is committed to ensuring equitable access to resources and creating dynamic spaces that foster civic engagement, an ILS that could support their rapidly growing population of 300,000+—and evolve alongside them—was paramount. With Symphony on SaaS, Irvine Public Library will enjoy rich, adaptable features and functionality, industry-leading security certifications, and exceptional customer service.

Additional SirsiDynix products, like Enterprise, a robust discovery platform, and BLUEcloud Circulation, an intuitive patron services interface, will work in tandem to streamline staff workflows and elevate the user experience.

"We are thrilled to partner with SirsiDynix to deliver a strong, comprehensive approach to information access and resource management through their robust suite of services," says City Librarian Julie Zeoli. "Providing Irvine residents with equitable access to information and streamlined services remains a core value for us, and we are confident that the quality and reliability of SirsiDynix's offerings will significantly enhance our community's experience," she adds.

SirsiDynix Executive Vice President Mike Nehren agrees: "We believe wholeheartedly in the City of Irvine Public Library's mission to encourage lifelong learning through access to books, technology, and programming, and are honored for the opportunity to not only support that mission, but provide the best library user experience possible. It is a true privilege to welcome City of Irvine Public Library as a valued partner."

well as those in surrounding communities. The Library provides access to books, information, programs, and services that encourage lifelong learning and community engagement.

The Irvine Public Library system currently includes two branches: Heritage Park Library and University Park Library. The Katie Wheeler Library is projected to open in 2026, with plans to continue expanding the system through additional library sites in the coming years.

While Irvine Public Library is newly established, the city's library history dates back several decades. The University Park Library, originally operated by the County of Orange, opened in 1975. Heritage Park Library followed in 1988, and Katie Wheeler Library was the most recent addition, opening in 2008.

## *About SirsiDynix*

SirsiDynix believes in the power of libraries. Transforming and shaping their communities every day, that power inspires us to connect people with knowledge at more than 20,000 libraries worldwide. SirsiDynix technology combines relevant resources with the Best Library User Experience (BLUE). With our Best-of-Breed approach, SirsiDynix gives libraries the greatest and most expansive range of options for their software. Complemented by the most experienced training, consulting, and support staff in the industry, SirsiDynix helps libraries to reach their highest potential while serving their communities.
